

# EMS SQL Manager for Oracle

Become more productive than ever before!

## TOP FEATURES

- ▶ Effective management tool for Oracle databases and all database objects
- ▶ PL/SQL Code Debugger
- ▶ Visual Database Designer
- ▶ Flexible interface for viewing, editing and printing data with Unicode support
- ▶ Ability to create and run queries with advanced visual constructor or professional SQL text editor
- ▶ Impressive data export and import capabilities. Support of most popular file formats
- ▶ Database snapshot creation in form of SQL scripts
- ▶ Effective security management
- ▶ Report designer with clear in use report construction wizard
- ▶ FREEWARE version
- ▶ Free One Year of Maintenance already included!

## OVERVIEW

Modern database management systems built on SQL technology are the foundation for company's data warehouse environment and play an important role in day-to-day business operations. Such environments need a solution that simplifies management process and increases database administrator productivity. Although organizations can install and use the DBMS as delivered, often the functionality needed to adequately support database development and maintenance is not provided by the DBMS product alone. Concepts of database management maintain the focus on real-world cases such as database design, data integrity, concurrent updates, data security and many other issues. With the help of the appropriate database tools a DB developer can reduce errors, speed up the complex work of analyzing, designing and implementing database applications. Specialized DBA tools will help reduce the costs associated with implementing efficient database administration.

**EMS SQL MANAGER** is a powerful tool for Oracle database system administration and development. It simplifies database management tasks throughout the database life-cycle, from initial creation to everyday servicing, maintenance and data manipulation. EMS SQL Manager offers plenty of powerful tools for database administrators and developers to satisfy all their needs. It makes creating and editing Oracle database objects easy and fast, and allows you to run SQL scripts, manage users and their privileges, build SQL queries visually, extract, print and search metadata, export data to 17 available file formats and import them, view and edit BLOB fields, and much more. The program has a friendly user interface with a well-described wizard system, so clear in use that even a newbie will not be confused with it. EMS SQL Manager will make your work with Oracle as easy as it can be!

## KEY FEATURES

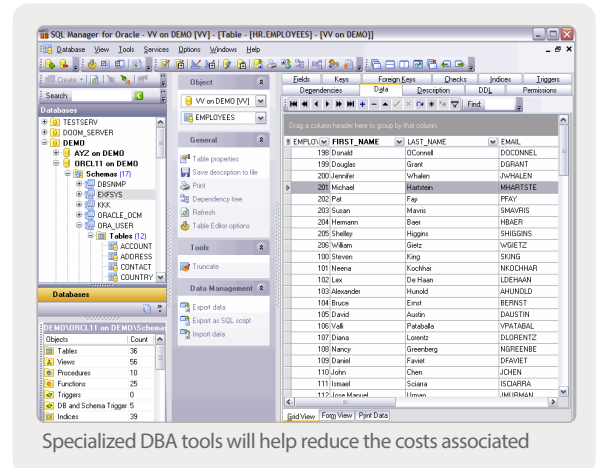

SQL Manager works with all Oracle versions from 8.1.7 to 21c and supports all of the latest Oracle innovations. It provides you with an ability to contribute to efficient Oracle server administration and development using a variety of available tools. You can work with different databases and Oracle servers on multiple connections simultaneously to ensure effective data processing. The program has an easy-to-use graphical interface and a lot of features for database maintenance and administration operations.

### EASY MANAGEMENT OF ORACLE OBJECTS AND SERVICES

In a modern company, Oracle servers can have a large number of services and corresponding objects, such as databases, security elements, tables, materialized views and triggers, functions and procedures, server activity and configuration information, package objects and many others. With the help of SQL Manager you can easily manage most of Oracle objects and native services. You can manipulate databases and schemas, tables and all their subobjects; view all object dependencies in one diagram; extract database objects and data to the SQL script; check the data integrity; create, schedule and execute single or recurring tasks; create database backups as well as restore from them and much more.

### ADVANCED DATA MANIPULATION TOOLS

One of the prime features of SQL Manager is the possibility to view, search and edit the database contents visually so you can retrieve the most relevant data. The program provides powerful capabilities for examining and modifying database contents: BLOB viewer/editor with several modes of viewing BLOB data, plenty of useful tools such as data grouping, summarizing, fast searching and filtering, master-detail view to work with two linked tables at the same time, table and card data views, ability to copy and paste selected records, duplicate any database member, advanced printing system and many other useful features.

Specialized DBA tools will help reduce the costs associated

## SYSTEM REQUIREMENTS

### HARDWARE

- ▶ 512 MB RAM or more;  
1024 MB or more  
recommended
- ▶ 200 MB of available HD  
space for program  
installation

### SOFTWARE

- ▶ Microsoft Windows XP
- ▶ Microsoft Windows Server  
2003
- ▶ Microsoft Windows Vista
- ▶ Microsoft Windows Server  
2008
- ▶ Microsoft Windows Server  
2008 R2
- ▶ Microsoft Windows 7
- ▶ Microsoft Windows Server  
2012
- ▶ Microsoft Windows Server  
2012 R2
- ▶ Microsoft Windows 8/8.1
- ▶ Microsoft Windows 10
- ▶ Microsoft Windows 11
- ▶ Microsoft Windows Server  
2016
- ▶ Microsoft Windows Server  
2019
- ▶ Oracle Client 8.1.7 or higher

### SUPPORTED ORACLE VERSIONS

- ▶ Oracle versions from 8.1.7 to  
21c

## EFFECTIVE SECURITY MANAGEMENT

SQL Manager works with Oracle security objects and helps you protect data from unauthorized disclosure and tampering. The program includes Grant Manager to manage grants, roles and system privileges (including granting privileges on selected databases, tables and fields).

## EXCELLENT VISUAL AND TEXT TOOLS FOR QUERY BUILDING

SQL Manager provides several tools you may need to manage your SQL queries. The tools allow you to create and edit the SQL text of a query, prepare and execute queries and view the results of query execution. SQL text Editor supports code completion and formatting, syntax highlight and code folding. Query designer can be used for building complicated queries visually without deep knowledge of SQL syntax. You can view the execution plan for each query created in the application and export the result data to any available format.

## IMPRESSIVE DATA EXPORT AND IMPORT ABILITIES

SQL Manager has the ability to import and export data to/from Oracle database. The program allows to easily export and import data to and from most popular file formats like MS Excel, MS Access, DBF, XML, ODF, TXT, CSV, etc. In addition, you can export data from a table or a query result to SQL script as a number of INSERT statements. Import/export settings can be saved as a template at any time for future use.

## EASY-TO-USE WIZARDS PERFORMING ORACLE ADMINISTRATIVE TASKS

Most administrative functions consist of repetitive sequences of tasks. With SQL Manager you can perform these tasks quickly and easily with friendly wizards, such as Backup and Restore Database Wizards, Create Report Wizard that simplify the process of creating reports as well as Advanced Statistics Expert Wizard which allows you to collect various statistics to improve the performance. Wizards will also help you to truncate tables and clusters in the selected database, generate a detailed HTML report about the selected database metadata, and much more.

## VISUAL DATABASE DESIGNER TO HANDLE DATABASE STRUCTURE IN A FEW CLICKS

Visual Database Designer is a handy tool that allows you to build database structure visually to represent the content of your database and its objects. Here is a short list of Visual Database Designer features: database diagram creation using the Reverse engineering tool; dividing diagram into different subject areas located on separate pages; creating/editing/dropping tables and table fields and links between them; saving as image or printing database diagram and a lot of visual customization options.

## MAINTENANCE INCLUDED

Software maintenance is a cost-effective and comprehensive service that includes technical support, software updates, and many other benefits. Within software maintenance service, you automatically receive the newest versions of EMS software upon their release at no additional cost. This allows you and your company to keep up with the latest software technology developments, take advantages of usability improvements, and manage software licenses more easily. SQL Manager already includes one year of Maintenance for free!

## ABOUT EMS

EMS /Electronic Microsystems/ is an Information Technology Company with software development as one of its activity fields. As an innovative, customer-focused company and the developer of leading database administration tools, EMS is the choice of thousands of companies in more than 90 countries. EMS customers include companies of all sizes from vast development teams in the world's largest organizations to progressive one-person shops. We strive to deliver exceptional quality and value to our clients, helping them to succeed in their development initiatives.
